EXPERIENCE

RPA Developer

Raymach Technologies

📅 Aug 2024 – Present

📍 Gurugram, India

- Developed and maintained **automation workflows** using **Node.js, Python, and Playwright** for **aviation-domain operations**, significantly reducing manual intervention and improving data accuracy.
- Built **React.js-based dashboards** to provide real-time operational insights for **airline business processes**, supporting informed decision-making across teams.
- Designed and implemented **RESTful APIs** using **Node.js** to enable reliable communication between frontend and backend systems.
- Assisted in **data processing and reporting** tasks using **Python**, improving efficiency in handling **airline operational data**.
- Followed **version control best practices** using **Git and GitHub**, contributing to collaborative development and code quality standards.
- Tech Used: ReactJS, Node.js, Playwright, Python, MSSQL, Git, GitHub.

ACHIEVEMENTS

- Solved **500+ problems** on platforms like [Leetcode](#), [GFG HackerRank](#).
- Secured **1st Rank** in the Codelite Virtusa Hackathon.
- Recognized as a **Level 4 Contributor** in **Hacktoberfest** for open-source contributions.
- Top Academic performer with **CGPA 9.14**.

TECHNICAL SKILLS

- **Programming Languages:** HTML, CSS, Javascript, Typescript
- **Frameworks:** ReactJS, NextJs, NodeJS, ExpressJS, Bootstrap, Tailwind CSS, Shadcn UI
- **Databases:** SQL, MongoDB, MSSQL
- **Tools:** Git, Github, Postman, Playwright
- **Other Skills:** Data Structures, Algorithms, Problem Solving

CERTIFICATIONS

- Advance Web Development - Coding Ninja
- Object Oriented Programming Java - Coding Ninja
- Python Programming - Coding Ninja
- Git and Github - Udemy

EDUCATION

BE. CSE. - 9.14 CGPA

Chitkara University

📅 2020 – 2024

📍 Solan, Himachal Pradesh

Higher Secondary - 93%

Jawahar Navodaya Vidyalaya

📅 2020

📍 Kothipura, Himachal Pradesh

PROJECTS

ICARGO Automation

- **Node.js | Python | Playwright | REST APIs**
- Built a Node.js service to parse SharePoint data and automate CASS/Non-CASS file processing for aviation workflows.
- Integrated REST APIs to automate iCargo credit-limit updates with reliable logging and real-time synchronization.

eGCA Approval Automation

- **Python | Playwright**
- Automated interactions with the DGCA eGCA portal to streamline pilot approval workflows.
- Implemented reliable form handling, validation, and status tracking to reduce manual processing and improve accuracy.

IATA Agent Access Control

- **Python | Playwright | Webhooks | Amadeus ARA**
- Automated IATA and non-IATA agent access management across multiple regions using Amadeus ARA.
- Improved compliance and reduced processing time by over 80% through idempotent API workflows.

Operational Intelligence Dashboards

- **React.js | Next.js | Data Visualization**
- Built responsive dashboards displaying real-time operational metrics from multiple data sources.
- Implemented interactive charts and filtering to reduce manual reporting and accelerate decision-making.

Sales Report Automation

- **Python | Playwright | Amadeus**
- Engineered a backend automation solution to extract and process operational reports from Amadeus.
- Reduced report generation time by 90% through server-side automation and API integrations.
- Automated complex workflows, reducing manual effort by 80-90% while minimizing processing errors.
